Hutton Communications Signs Nationwide Distribution of Strix Systems Wireless Mesh Network Products and Services

CALABASAS, Calif.-- Strix Systems, the market and technology leader in high-performance wireless mesh networking, today announced that Hutton Communications, the North American leader in value added wireless equipment distribution, will sell Strix Systems full line of wireless mesh networking products and services nationwide.

Hutton Communications is one of the largest U.S. distributors of wireless distribution systems with seven warehouse locations across the United States and Canada, with a full-time team of dedicated sales engineers. Hutton chose Strix Systems as a result of the company's proven track record for delivering the industry's de-facto standard robust high performance multi-radio products for wireless mesh networks. Hutton adds Strix Systems products to its existing extensive suite of wireless products, components, and accessories to their network of over 1,000 value added resellers.

Strix Systems products are an exceptional compliment to Hutton's existing portfolio enabling the distributor to offer a new range of wireless solutions. Strix Outdoor Wireless System (OWS) is the industry's only patented high performance modular wireless mesh network system capable of supporting up to six (6) radios of 802.11a, 802.11b/g, 802.11j and high power licensed public safety 4.9 GHz in a single chassis. Strix OWS enables a mix of access and backhaul configurations while delivering the range, coverage and multi-hop scalability to maximize the Total Cost of Ownership (TCO). Strix Mobile Wireless System (MWS) and high-speed mobility innovations in Strix Access/One Mesh OS™ make high speed mobile roaming possible. Strix Hot Spot System (HSx) is deployed for cost effective point-to-multipoint hot spots and hot zones, while Strix Integrated Wireless Video Systems (IWVS) is deployed for mission critical video surveillance applications.

Hutton delivers on a tradition by offering the industry's latest and most robust wireless technologies to its customers. The decision to embrace Strix Systems technology was easily achieved. "We believe in offering our customers the best solutions in the marketplace, our relationship with Strix Systems is representative of that commitment," said Ron Ryan, Executive Vice President of Sales and Marketing, Hutton Communications.

We're excited about our relationship with Hutton" said Martin Levetin, Senior Vice President for Sales and Marketing at Strix Systems. "As the premier distributor of wireless equipment in the U.S., Hutton Communications is proving a significant partner in the expansion of Strix Systems worldwide."

In addition to Hutton's nationwide distribution, the company offers value added services including site survey, design, project engineering and site kitting for wireless mesh networks in addition to traditional wireless applications.

Dealers, resellers and integrators should go to <http://www.strixsystems.com/Hutton> for additional details and to make contact with a Strix Systems or Hutton representative.
